Reasons for Allowance

1. Claims 1-9 and 23-29 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Claims 1 and 23 claim a system and method of enforcing policy in a multi-computer service application having a plurality of software modules that execute on a plurality of computers, comprising: sending a notification from a particular module to a policy module; the policy module responding to the notification by: determining a request for one or more destination modules; providing the request to an output port of the policy module is documented by the cited prior arts. However, the invention has some particular combination limitations that are different and distinct from prior arts. Among the differences between claimed invention and the prior art of record, the major difference is the combination of configuring logical output ports and logical input ports on different modules in accordance with a logical model, wherein each logical port is defined by port software; configuring logical data connections between the logical ports in accordance with logical model; each port is configured to communicate through different numbers of logical data connections without modifying the port software and forwarding the request to input ports of a plurality of the modules in accordance with the configured logical data connections is novel thus the invention is patentable.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
